VIRTUCLEAN INSTRUCTIONS

STANDARD TUBING CPAP MACHINES

The VirtuCLEAN is a two-step process.

Step 1: Sanitizing face mask/ nasal pillow and tubing.

- The first thing you will do is disconnect the tubing from your CPAP machine with the face mask/ nasal pillows still attached to the other end of the CPAP tubing.
- Next you are going to place the face mask/ nasal pillows portion of the CPAP equipment into the travel bag that came with your VirtuCLEAN and zip the travel bag up – (leaving a portion of the tubing running out of the travel bag). Then connect the VirtuCLEAN to the other end of the tubing – (this is the portion of the tubing that was previously connected to the CPAP machine.)
- Then you will turn the VirtuCLEAN unit on and allow it to run its 30-minute disinfecting cycle. Which will be followed up with a 5-minute fresh air flush cycle, where the device pushes fresh air through the CPAP equipment to help dissipate any remaining odor or ozone that may still be lingering.
- Recommendations: We recommend that this step is done every day.

Step 2: Sanitizing the Humidifier Chamber

- The first thing you want to do is empty the humidifier chamber of its water.
- Next you are going to disconnect the face mask / nasal pillows portion of your CPAP equipment from the tubing. And connect the VirtuCLEAN to this end of the tubing. – (The humidifier chamber should still be connected to your CPAP machine; the tubing should also still be connected to the CPAP machine as well, with the VirtuCLEAN connected to the other end of the tubing.)
- Now you turn the VirtuCLEAN unit on and allow it to its run 30-minutes disinfecting cycle. Which will be followed up with a 5-minute fresh air flush cycle, where the device pushes fresh air through the CPAP equipment to help dissipate any remaining odor or ozone that may still be lingering.
- Recommendations: We recommend that this step is done at least once a week. – (If you wish to do this step more often it, feel free it will not cause any hard to your CPAP equipment.)

HEATED TUBING & ALL NON-STANDARDED TUBING CPAP MACHINES.

The VirtuCLEAN is a two-step process.

Step 1: Sanitizing face mask/ nasal pillow and tubing.

- The first thing you are going to do is disconnect the face mask / nasal pillows from the CPAP tubing and place inside of the travel bag that came with your VirtuCLEAN.
- Next you are going to disconnect the CPAP tubing from the CPAP machine.
- Then you will place the portion of the tubing that was connected previously to the CPAP machine and place that end of the tubing into the VirtuCLEAN travel bag. – (This end of the CPAP tubing will not be connected to anything.) Then zip the travel bag up – (leaving a portion of the tubing running out of the travel bag).
Next you will connect the VirtuCLEAN to the other end of the tubing. – (This portion of the tubing was previously connected to your face mask/ nasal pillows.)

Then you will turn the VirtuCLEAN unit on and allow it to run its 30-minute disinfecting cycle. Which will be followed up with a 5-minute fresh air flush cycle, where the device pushes fresh air through the CPAP equipment to help dissipate any remaining odor or ozone that may still be lingering.

**Recommendations:** We recommend that this step is done every day.

**Step 2: Sanitizing the Humidifier Chamber**

- The first thing you want to do is empty the humidifier chamber of it’s water.
- Next you are going to disconnect the face mask / nasal pillows portion of your CPAP equipment from the tubing. And connect the VirtuCLEAN to this end of the tubing. – (The humidifier chamber should still be connected to your CPAP machine; the tubing should also still be connected to the CPAP machine as well, with the VirtuCLEAN connected to the other end of the tubing.)
- Now you turn the VirtuCLEAN unit on and allow it to run 30-minutes disinfecting cycle. Which will be followed up with a 5-minute fresh air flush cycle, where the device pushes fresh air through the CPAP equipment to help dissipate any remaining odor or ozone that may still be lingering.

**Recommendations:** We recommend that this step is done at least once a week. – (If you wish to do this step more often it, feel free it will not cause any harm to your CPAP equipment.)

**~ Adapter for heated tubing & non-standard tubing CPAP machines~**

If you wish to have an adapter mailed to you, to make the 1st step process easier. Please go to [https://cleancpap.net/](https://cleancpap.net/) to purchase the adapter, the cost is $9.99.

**Have an adapter to make your VirtuCLEAN needs easier?**

You will follow the instructions above for the Standard CPAP instructions above. However, on the second bulleted instruction where it instructs you to connect the VirtuCLEAN to the tubing, you will connect the adapter to the VirtuCLEAN and then connect the other end of the adapter to the tubing that was previously connected to the CPAP machine.
